

1. First check your project have any compile error

1.1 Open cmd from your project file

Select all from address bar

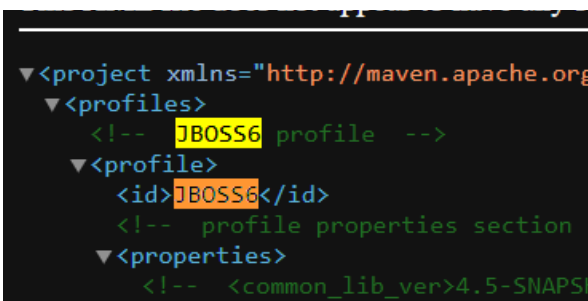

Type cmd on it and enter

It directly go to the file path

Then check pom.xml file

Get profile ID

On the cmd type

mvn clean package -PJBOSS6

If your code error free, then it will compile without an issue.

```
C:\Windows\System32\cmd.exe

[WARNING]
[WARNING] Some problems were encountered while building the effective model for com.interblocks:iadmin:9.0.8-${VersionSufix}
[WARNING] 'version' contains an expression but should be a constant. @ com.interblocks:iadmin:9.0.8-${VersionSufix}, C:\Users\jith\OneDrive\Desktop\NMB\NMB-CTA\TRUNK\iAdmin\pom.xml, line 112, column 11
[WARNING] 'dependencies.dependency.(groupId:artifactId:type:classifier)' must be unique: com.interblocks:iadmin:9.0.8-${VersionSufix} vs 2.0-m10 @ com.interblocks:iadmin:9.0.8-${VersionSufix}, C:\Users\jith\OneDrive\Desktop\NMB\NMB-CTA\TRUNK\iAdmin\pom.xml, line 515, column 18
[WARNING]
[WARNING] It is highly recommended to fix these problems because they threaten the stability of your build.
[WARNING]
[WARNING] For this reason, future Maven versions might no longer support building such malformed POMs.
[WARNING]
```

You can find your class files from "target" folder

Drag and drop class files to war.

iAdmin.war - xarchiver 0.5.4.17
